

Bringing new technology to Central Utah

Horizon Home Health has brought new technology to south central Utah. Currently in Sevier, Wayne, Piute, Garfield, Iron and many other counties, Horizon Home Health is there to serve you with our exclusive HomMed® monitoring system which allows us to provide continuous medical supervision while you remain in the comfort of your home.

This is achieved by collecting vital signs at scheduled report times through a series of short easy steps via the HomMed® home monitoring system. It then automatically transmits your information to the central station where your home care nurse can assess your vital signs. The home unit is a vital-sign-monitoring and communication device that measures weight, blood pressure, heart rate, temperature and oxygen saturation. Additional adapters can be added to take blood sugars and other specific measurements recommended by your physician. Regular monitoring allows clinicians and your physician to assess your condition and react quickly to any concerns.

When used as part of an overall health plan, the HomMed® system can reduce emergency room visits and hospital admissions and improve your quality of life. Mary Fullmer from Circleville said, "I am thrilled to have someone monitoring my mother's vital signs all of the

time, Horizon's staff is so kind and considerate. It really gives me peace of mind to know how much they care and that they will answer any questions I have."

Other patients agree that the HomMed® monitor is easy to use and not time consuming. Each day, a gentle, friendly voice guides them through the simple, 3-minute procedure to collect all of their vital signs and asks customized subjective questions to which they answer yes or no. These questions are to assist in further evaluation of their conditions and quality of life measurements.

Garfield County was without home care for several years before Horizon Home Health started in the summer of 2000. People working in the medical field in Garfield County agree that the service is valuable to its residents.

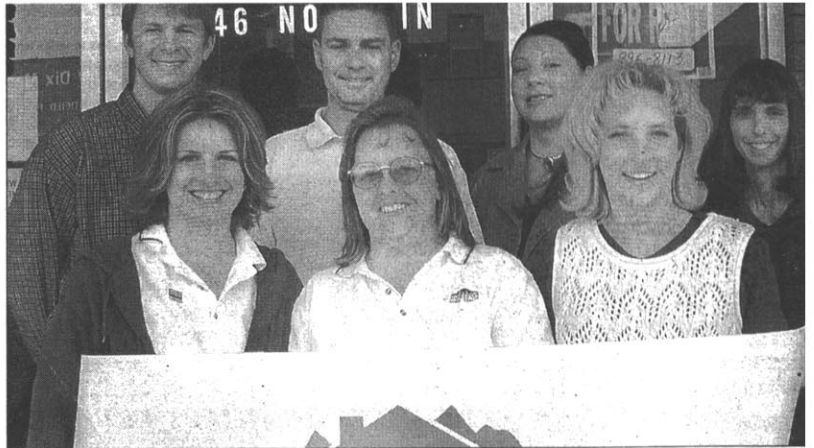

"We love Horizon Home Health," said Dr. Todd Mooney from Garfield Memorial Hospital. "They have always been a great asset to both health care providers and to the patient in extending the level of care from the hospital back into the community."

"All of the patients I see are so glad to have home health again in Garfield County and the rural areas," said Marnie Blevins, registered nurse from Panguitch.

The staff at Horizon Home Health are professionals that have a genuine concern for the people they serve.

With the assistance of the HomMed® system and their professional knowledge, they can build a plan of care tailored to fit your specific medical, social and emotional needs. They are proud to provide south central Utah with another choice of home health care providers.
